

MOUNTAIN BIKE, MALLERAY

BIKEPARK VALBIRSE

The BikePark Valbirse project includes the creation of 3 mountain bike tracks made by professionals of the field (Flying Metal, Nico Vink and Battcrew). These tracks are of three different levels - blue, black and red. The aim of the project was also to save the Orvales ski lift, which was destined to disappear. Thanks to the upgrading by the BikePark, the lift was also able to reopen in winter, when snow conditions permit. The ski lift allows you to go up the mountain bike trails in complete peace of mind!
