

ART, EXHIBITION, BIEL

REPTILES EXPO IS MOVING TO THE LES STADES SHOPPING CENTRE AT THE TISSOT ARENA IN BIEL!

See more than 250 animals, including 80 different species, in their natural habitat, in a natural setting, over an area of 1400 m², from 20 September to 16 February.

The exhibition is open every day, including Sundays and public holidays.

The aim of the exhibition is to teach young and old alike to get to know these much-feared animals better, while giving them the chance to experience an unforgettable experience through a family-friendly, educational activity.

These days, it's vital to inform people and help them discover the little-known world of reptiles and the danger of their extinction. 'Better understand, better protect' is our motto. This year, visitors will be able to discover for the first time in Switzerland an exceptional snake that was officially discovered relatively recently in Iran (2006): the spider viper (*Pseudocerastes urarachnoides*). It has the most elaborate lure of all snakes, with a growth at the end of its tail that looks just like a small spider, making it a formidable lure for foraging birds. A unique sighting, as the only other zoo where it can be found is in the Czech Republic!
