

ZOO, CRÉMINES

SIKYPARK

Sikypark makes sure that native and exotic wild animals in need get a good place to live. Therefore we run a senior residence for predators, a parrot station as well as the Station Mami for injured or orphaned wild animals. The Sikypark is a meeting place for animals and people at eye level. During guided tours and training courses, we promote and convey a sustainable approach to nature and an understanding of the animals' needs. On the discovery trail, explorers big and small go on a search for traces of our native flora and fauna. In the summer months, our birds of prey take part in flight training and demonstrate their amazing skills.

Get fit for the next adventure with a stop at the self-service restaurant. Enjoy your meal in the dining room or on one of our terraces with a view of the playground and the animals.
